

- River basin: 1.105 km²
- Location: Carinthia and a small part of East Tyrol
- Tributary of the Drau
- The riverbed lies on a sea level between 1.290 m and 550 m
- After massive floods in the 1960ies huge amount of technical measures
- In contrast to other Austrian regions only small floods or landslides in 2002, 2005 and 2006
- Awareness decreased
- But: risk of extreme floods still exists
